

Contractor Safety Webinar

Tuesday, June 18, 2024, 2:00 p.m. ET

On 6/18/2024 at 2:00 p.m. ET, the SMCX will present a “Contractor Safety” webinar, with a partial focus on the Occupational Safety and Health Administration (OSHA) Voluntary Protection Programs (VPP) implementation applicability.

This webinar focuses on defining VPP classification of contractors, describing VPP requirements for contractors and describing basic safety procedures you should cover during contractor orientation at your organization or installation.

This webinar will provide an overview of the types of Contractors working at VPP Star sites and at sites working to earn VPP Star recognition. It will also include a discussion on the VPP standards each classification of Contractor is required to follow, as well as various responsibilities of both the host site and the working contractors.

The webinar will be beneficial to contracting representatives, higher level safety professionals, and personnel who work directly with contractors.
