

DoD SMS Star Site History

The Department of Defense (DoD) Safety Management Center of Excellence (SMCX), operated by Concurrent Technologies Corporation (CTC) since its inception in 2006, supports the Office of the Under Secretary of Defense for Personnel and Readiness, Personnel Readiness & Safety (OUSD P&R, PR&S) goal of helping as many DoD sites as possible achieve Safety Management System (SMS) recognition, such as Occupational Safety & Health Administration (OSHA) VPP Star. These Star sites typically experience significant reductions in mishaps and lost time due to injuries, along with an improved safety culture. As of August 30, 2018, 134 DoD sites had an active Star recognition. Below is a timeline with the first SMCX-supported Service and Agency sites to achieve SMS recognition milestones.
